COMPANY PROFILE

Network Design Technologies (NDT) is a privately held **8(a), DBE and MBE** certified small business that is a design/build general contractor with nearly 15 years of expertise in electrical, IT, and structured cabling for telecommunications. Our partners contribute an additional 100 years of federal construction contracting experience in various building trades. NDT's philosophy is to share ideas about technology to assist public and private companies in overcoming technical business obstacles with efficiency. We provide solutions that will get the job done to meet your project goals on time and within budget.

DIFFERENTIATORS

We respond to each customer's unique needs. We keep listening to our customers and offer best in class solutions. We clearly define the goals of every general construction, electrical and communication systems installation. This is accomplished by forming partnerships between associates and clients with cornerstones of mutual respect, integrity, and honesty. NDT believes in smart design and conceptual engineering practices to implement solutions for our commercial and government clients' productivity and profitability.
